Buddleya Variabilis Magnifica, Butterfly Bush.

BUDDLEYA VARIABILIS

(Butterfly Bush, or Summer Lilac.)—One of the most desirable summer flowering shrubs, beginning to bloom in July, it continues until cut by severe frost. The flowers are of a pleasing shade of violet-mauve, and are borne in dense cylindrical spikes, which, under liberal cultivation, are from 12 to 15 inches in length by 3 inches in diameter; it succeeds everywhere and flowers freely the first season planted. **Price, 25 cents each; large field grown plants, 50 cents each.**

**FORMAL TRIMMED
ALTHEA HEDGE**

Price, 2 to 3 ft. plants $\left\{ \begin{array}{l} \$ 1.50 \text{ for } 12 \\ 4.50 \text{ for } 50 \\ 8.50 \text{ for } 100 \\ 40.00 \text{ per } 500 \end{array} \right\}$ by express—not prepaid

Dozen by mail, postpaid, \$2.00.

**Offered Only in Single Flowering Plants
Mixed Colors.**

**PUSSY
WILLOW**

PUSSY WILLOW

A shrub or short trunked tree, foliage smooth, bright green above and whitish beneath.

Worthy of more extended cultivation; thrives on dry ground. The bloom of the Pussy Willow is one of the earliest harbingers of Spring and is very interesting. Twigs may be taken from the bush in winter and if placed in vase of water, in the house, will soon open their buds. We are offering this novelty this season for the first time. **Price, Field Grown Plants, 25 cents each, \$2.50 per dozen.**

ALTHEA or ROSE OF SHARON

There is no plant today more useful or desirable for hedge purposes than the Althea or Rose of Sharon. It has all the good qualities of any other hedge plant, some that no other hedge plant has.

VERY HARDY.

It will do well in nearly all locations, except in the extreme cold sections of the northern states. It is a sturdy grower and will flourish where many other shrubs would fail to grow.

BEAUTIFUL IN BLOOM.

In season these shrubs are covered with beautiful flowers, some of them double, which range in color from Blue and Purple to Violet and Red, Flesh color and White. A Hedge of Altheas in bloom is a sight never to be forgotten. They remain in bloom from 4 to 6 weeks, and its bright green foliage makes it a beautiful hedge either in or out of bloom.

MAKES EITHER A TALL SCREEN OR A LOW HEDGE.

If left untrimmed they will make a fine tall screen 6 to 8 feet high. They should be planted 12 inches apart for screen purposes, and about 8 inches when used as a low hedge. They can be kept down as low as 2 feet, with very good results, except that they will naturally produce less bloom as a low hedge, than if left to grow tall.

TRANSPLANTS VERY EASILY.

Few shrubs will transplant as easily as the Althea, and with as little loss. The plants we are offering will make you a good hedge or screen the second year after planting and will reward you each year many times their original cost.

TAKES VERY LITTLE CARE.

Altheas will do well in almost any soil, but like all other plants, will do best if given good soil. They do not require trimming as often as other hedges, and will make you one of the most interesting hedges you can plant. Should be trimmed in spring, before growth starts, to height you wish.

INNISFALLEN GREENHOUSES
Established 1877

This, our annual Spring catalog, comes to you as our 48th issue since the INNISFALLEN GREENHOUSES were established in 1877.

The hundreds of thousands of satisfied patrons who have been served is good evidence that our service is appreciated and our products satisfying, and on our part we are highly grateful to those who have entrusted their orders to us year after year.

Our promise for 1925 is to give that same satisfying service that has characterized the INNISFALLEN GREENHOUSES in the past.

One good planting helps a whole street, two helps even more and property on a street where practically every house is so ornamented is generally worth at least double that of similar property located in bare sections of any town. Flowers pay big dividends in human happiness—wonderful returns at an insignificant investment of effort and money.

We are quite proud of this issue of our catalog, in it we offer a wide selection of ornamental shrubs, vines, bedding plants, house plants, seeds, fruits, insecticides, fertilizers, books and even bird houses. We hope you will be interested in it, no agents are employed other than this medium, in bringing to your attention our large stock and variety of everything needed in beautifying your home grounds, and offering to you at very reasonable prices.

Look it over NOW and use the order blank.

We suggest that you give us your order as early as possible, and give date when you would want the plants shipped. We will carefully file the order and send at the designated time. This will often save delay in filling orders that you might send us during the rush season in April and May, when orders are taken in turn.

We guarantee plants to arrive in good condition, if they do not, we will esteem it a favor to be notified at once.

Faithfully yours,

SPRINGFIELD, OHIO.

THE GEO. H. MELLEN CO., Innisfallen Greenhouses, SPRINGFIELD, OHIO

All Plants Are Plainly Labeled All plants are plainly labeled with a printed label.

Our Plants Are All on Their Own Roots as any part of the plant remains, it will produce uniformly the same beautiful flower. We grow them slowly, to avoid forcing, our particular aim being to have a plant small enough to transport through the mail readily without injury but with the vigor and thrift of much older plants. Consequently on being planted out a thousand miles away the purchaser is surprised to see the plant suddenly spring forth in luxuriant growth and bloom.

Our Terms Are Cash With Order No order sent C. O. D. unless a remittance of one-half of the amount of the order be made to guarantee the acceptance.

Our Plant, Seed and Fruit Departments are entirely separate. Often seeds or plants on a combined order may be sent before balance of order is filled. If only one part of order is received, please wait a few days for the balance before writing us.

Outdoor Planting We are often asked as to the best time to plant. Always choose the most favorable time in your locality, and order accordingly. We can send most plants safely when desired. As there are so many degrees of latitude and such varieties of temperature from various causes, it is impossible to dictate as to the precise time to plant out of doors. Customers must judge of this for themselves, always remembering that it is not safe to plant out until all danger of freezing is past, and the ground is in warm, mellow condition.

Index On page 80 will be found an alphabetically arranged table of contents. This will greatly assist you in finding any particular plant you may wish.

Six Garden Collections of Ever-Blooming Roses FOR BEDDING OR INDOOR POT CULTURE.

Our list of ever-blooming Garden Roses, described and illustrated on the following pages, will, we trust, find favor with our customers. While it contains some of the most satisfactory varieties of recent introductions, it also contains sorts which have made a reputation for themselves as splendid bedding varieties.

As is our custom in making up collections for our customers, we have selected varieties showing marked contrasts in color combined with hardiness, vigor of growth and abundance of bloom, so that purchasers in obtaining one or more of these collections may rest assured that they procure sorts which, although limited in number, will give them a variety unexcelled in all the prime qualities of the best Garden Roses.

Our Garden Roses are famous throughout the country; they give universal satisfaction, as is evidenced by the number of orders and congratulatory letters we receive annually from purchasers. Even the smallest size will, under ordinary conditions, give an abundance of bloom the first year, but the larger sizes will, of course, bloom earlier and more profusely.

ROSES And HOW to GROW THEM

"THE QUEEN OF FLOWERS"

No garden, however small, is complete without Roses. There are no flowers grown that are more universally admired than the Rose, and their cultivation is yearly extended as it becomes more generally known that they are so easily grown, and that they can be procured at so trifling an expense. All that is necessary to have them grow and bloom freely is to plant them in a bed of deep, fresh, loamy soil, well enriched with thoroughly rotted manure, and they are certain to do as well as a bed of Geraniums. Springfield is known as the world's center for the growing of fine Rose plants, and the large number of greenhouse establishments here count their annual output by the millions. This and our constantly growing business is good evidence that our "methods" are all right.

ROSES ALL ON THEIR OWN ROOTS

Our Roses are all grown from cuttings and are consequently **all on their own roots**. If they are inclined to sprout from the roots, they should be encouraged to do so, as young, vigorous shoots produce the finest flowers; they **cannot throw up wild shoots**, because root and top are the same. As long as any part of the plant or root remains it will produce the same beautiful flower. We do not send out any budded or grafted Roses.

Our Roses are All Grown in Pots

In good, fresh soil, without stimulants; are strong healthy plants, kept from blooming here by cutting the buds off as they appear, and with any fair treatment on your part will be sure to grow; and the ever-blooming class will bud and bloom as soon as they start to grow vigorously.

Pot Culture for House and Conservatory

The ever-blooming Roses alone are best for house culture. Have a good, rich soil, mixed with one-fifth sand. Sod and well-rotted cow manure make the best soil for Roses. After potting, the plants ought to be thoroughly watered and kept from the burning sun. The earth should be moderately dry before watering again. If the Rose gets too large for that pot, shift into one or two sizes larger, but do not use too large pots.

Outdoor Planting

We are often asked as to the best time to plant. Always choose the most favorable time in your locality, and order accordingly. So many degrees of latitude and such varieties of temperature from various causes, it is impossible to dictate as to the precise time to plant out of doors. Customers must judge of this for themselves, always remembering that it is not safe to plant out until all danger of freezing is past, and the ground is in warm, mellow condition. For the Northern States we recommend Spring as preferable to Fall planting.

Preparation of Rose Bed

Select a sunny spot not undermined by roots of trees, and quite level with the grassplot. Prepare your bed by digging to the depth of eighteen inches. Any good garden mould will grow Roses, but they are especially fond of small clods of clay in the soil. If the bed is not underdrained naturally, provide drainage by means of broken bricks and stones at the bottom. Add one-fourth old, well-rotted cow manure to the soil and clay. Ground bone ranks next to cow manure as a fertilizer, and may be used in place of it or in addition to it. Roses are rank feeders and amply repay the food and moisture given them, both with luxuriance and ele-

gance of foliage, and profusion and size of bloom. After the plants have been set out, which should be early in the season, keep the soil loose by frequent shallow stirrings, till the middle of June, when they should be mulched by covering the surface of the bed to a depth of an inch or so with old manure or any strawy material, to prevent evaporation. An occasional application of manure water greatly stimulates growth, which, with most Roses means bloom.

Pruning

March and April are the best months for this operation. Moderate pruning insures growth and more blooms. Cut out all decayed wood. All the shoots bearing flowers ought to be shortened two-thirds after blooming.

Winter Protection

In the latitude of Springfield a covering of three or four inches of manure or leaves over the entire bed is sufficient. In colder latitudes, draw the leaves up around the stems six or eight inches higher, and in very cold places earth them up and protect with corn stalks or evergreen boughs. For Tea Roses a good plan is to put a temporary fence of twelve-inch chicken wire netting around the bed, filling in loosely with leaves, with a little earth or some branches over all to prevent them from blowing away. This should not be done, however, until severe cold weather sets in, so that nearly all the leaves are off the plants and they are thoroughly ripened, which is usually about December first in this latitude.

Diseases and Insects

Healthy, vigorous, well-cultivated Roses in well-located beds are less liable to the ravages of insects and diseases than weak specimens of slender growth and poor vitality. Therefore, keep your Roses healthy by good cultivation. It is the indifferent, indolent grower whose Roses are the prey for insects, although the weather in certain seasons aggravates the troubles of a Rose grower considerably.

Mildew

This is a fungus disease, shown by the grayish, crinkled and mouldy appearance of the foliage, caused chiefly by cool nights and hot days. Remedy: Dust lightly over the foliage flour of sulphur on a warm sunny day.

STIM-U-PLANT

Makes a Wonder Garden

An All-the-Year Fertilizer for Garden and House Plants

A PLANT FOOD IN TABLET FORM

The Ideal Year-Round Feeding Method

Feed your plants as you feed yourself. Do not give them breakfast, dinner and supper at one time, for an overfed plant gets indigestion and is harder to get back to healthy growing conditions again than one that has been underfed.

Plants in pots, especially when growing vigorously, soon use up the nourishment that is in the soil, therefore, to keep your plants healthy, feed them about every ten days or two weeks and **avoid the error of feeding too much at one time**.

STIM-U-PLANT TABLETS are an ideal food for potted plants, they are clean, they take up small space and one quarter of a tablet is enough to use at a time on small plants.

Easy to Use

Simply insert the tablet about one and one-half to two inches below surface of soil at the roots, where it dissolves and produces the qualities which mean the same to a plant as blood to a human being.

Simply insert in soil near plants, or dissolve in water at the rate of four tablets to the gallon and apply as liquid manure.

These Tablets Are the Last Word in Modern Gardening Efficiency

All growing plants must be fed if you expect them to produce results, and they respond in a remarkable way to proper feeding. Everything you grow depends on fertilization. **STIM-U-PLANT** will make flowering plants bloom freely and hold their blossoms longer; foliage plants quickly put on new growth; vegetable crops, berry bushes, fruit and other trees increase production, so it pays for itself many times over in a season.

Have **STIM-U-PLANT TABLETS** on hand so you can apply them to your outside plants **as soon as they start growth** and note the amazing results.

Guaranteed chemical analysis 11 per cent nitrogen, 12 per cent phosphoric acid, 15 per cent potash. The proportions are accurate, there is no wasted filler, and in this form you apply plant-food exactly when and where and as needed.

Complete directions with every package.

Price, postpaid: 30 tablets, 25 cents; 100 tablets, 75 cents; 1,000 tablets, in bucket, \$3.50.

GARDENIA—Bright yellow cream color when open; very fragrant and free; early flowering. This is the hardy Marechal Niel; double yellow flowering.

PAUL'S SCARLET CLIMBER—Vivid scarlet, shaded crimson. Makes a brilliant display for a long period of time in the garden. A wonderful new climbing Rose. Received the gold medal and cup for the best new climber at the National Rose Society's exhibit.

THOUSAND BEAUTIES—The flowers are the most delicate shade of pink ever seen in a Rose, might be described as a white delicately flushed with pink changing to rosy-carmine. It gets its name from its many flowers and the variation in coloring.

WHITE DOROTHY PERKINS—A pure white sport of the well-known Dorothy Perkins, of same habit of growth and freedom of flowering; a splendid companion for the pink variety, as it flowers at the same time.

Ever-Blooming Hybrid Tea Roses

THE HYBRID TEA ROSES are the hardiest of the ever-bloomers, standing the winter in the northern latitudes with but little protection, and are perfectly hardy south of the Ohio River without any protection whatever. They bloom constantly throughout the summer. The flowers increase in size and beauty as the weather becomes cooler, coming into perfection in autumn. This is, we believe the most popular class of Roses now in cultivation. These varieties are the result of a union between the ever-blooming Teas and the Hardy Hybrid Perpetual class, thus combining the exquisite richness of coloring and beauty of form in the one with hardiness, vigorous growth and pungent fragrance of the other. The following collection has no equal.

Price, Young Plants, 20c Each; Four for 75c; Twelve for \$2.00, Except Where Noted. Two-Year-Old Plants, from 4-Inch Pots, 55c Each; Four for \$2.00; Twelve for \$5.50, Except Where Noted.

Angelus White with cream tinted center. A big rounded Rose with high center; very lasting and fragrant. Foliage dark green, disease-resistant. A vigorous upright grower and free in bloom. Was awarded Certificate of Merit of the Chicago Flower Growers Association; also Silver Medal of the New York Flower Show. **Is a fine Rose for the outdoor garden.**

Antoine Rivoire A handsome new Rose of vigorous habit of growth, with large, full Camellia-shaped flowers. Color rosy-flesh, on a yellow ground, shaded with a border of carmine; flowers five inches in diameter.

Bessie Brown We regard this Rose as one of the finest Roses in cultivation. The flowers are very large and highly built and double; color is a creamy-white with a beautiful shade of pale, tender flesh, resembling gloss silk. It is highly scented and a most magnificent Rose in the open ground.

Columbia A big Rose, the open flower measuring 6 in. across. The color is a true pink, about the shade of a perfect Shawyer, deepening as it opens to glowing pink. A peculiarity of the variety is that the shades all become more intense until the full maturity of the open flower is reached and this color is enduring; a great Rose.

Eugene E. Marlitt

Kaiserin Augusta Victoria

Kaiserin Augusta Victoria The best white Rose in the world. This beautiful Rose has not only a royal name, but it is a royal Rose as well. It is a continuous bloomer, producing successive crops of buds, and formed with large petals of best substance; shows no center when fully open; color pure creamy-white. It far surpasses any other white Rose in all particulars, and has a much richer perfume.

Eugene E. Marlitt Rich bright carmine with scarlet tones. It is a strong, upright grower and a constant and profuse bloomer with extra large flowers; full, deep and double, and deliciously tea-scented. Bright, deep, shining rose.

Crimson Queen Strong, upright grower, flowers large and full. Color a rich bright velvety crimson. A grand garden Rose as it is always in bloom.

Etoile de France The gold medal Rose of France—flowers very large and borne on good, long, stiff stems; color a lovely shade of clear red, crimson-velvet; very fragrant and keeps well. In England where it has been tried extensively, it has caused quite a sensation. Good grower, free bloomer, fine, rich color, deliciously fragrant.

Francis Scott Key The flowers are from large to very large, opening to a high center. The color is a magnificent deep red rose. Wherever it has been staged this Rose has swept all competitors from the boards and secured every prize it has entered for. Grand for the garden.

F. R. Patzer A beautiful and distinct Rose of very free flowering character; the growth is very robust and erect, with large and handsome foliage. The blooms are produced with great freedom, they are carried on stiff stems and are of large size and substance and perfect formation; highly tea-scented. Color, brilliant salmon-pink, of very fine shape, buds sharply pointed.

Golden Ophelia It is a sturdy, stiff-stemmed grower, with beautiful foliage, quite closely set, and glossy. The flower is of medium size, from a beautifully formed bud of bright, golden yellow. Has excellent texture; profuse in bloom; makes a marvelous "bush." We are very enthusiastic over this beautiful, true yellow novelty, which will rank high in its class. Fine when used in corsage work. **Price, 35 cents each; plants from 4 inch pots, 75 cents each.**

Gruss an Teplitz As a bedding Rose this is one of the finest. The color is brightest scarlet, shading to deep, rich velvety crimson. It is very fragrant. The freest grower and the most profuse of any ever-bloomer. The mass of color produced is wonderful, and the foliage is extremely beautiful, all the young growth being a bronzy-plum color. A queen among scarlet bedders.

Ever-Blooming Hybrid Tea Roses—Continued

Price, Young Plants, 20c Each, Four for 75c, Twelve for \$2.00, Except Where Noted. Plants from Four-Inch Pots, 55c Each, Four for \$2.00, Twelve for \$5.50, Except Where Noted.

Hadley Deep, rich, velvety crimson, retaining its brilliancy throughout the year. Well formed buds and large, double flowers on rapid growing, long and stiff stems, prolific during all seasons. Fragrance excelled only by American Beauty.

Helen Gould This is a better Rose for general planting than American Beauty, the dream and hope of every Rose grower for years past. The flowers are full and perfectly double, the buds beautifully made and pointed. The color is warm rosy-crimson, like the color of a ripe-red watermelon.

Helen Cambier Great Yellow Garden Rose. The growth is free and vigorous, very free blooming, flowers of splendid substance and a delightful shade of deep rich golden-yellow. In extreme heat comes a deep amber color. The buds are full and firm, lasting a long time when cut. As the flowers expand the center of the Rose discloses depths of golden-yellow, with light orange tints, while the outer petals lessen to lemon-yellow.

Hoosier Beauty Glowing crimson-scarlet with darker shade in the center; buds of good length and splendid shape; ample petalage with a texture like velvet, opening into a magnificent bloom of dazzling brilliance.

Killarney A very beautiful Hybrid Tea Rose. The color is an exquisite shade of deep shell-pink, lightened with silvery-pink. The base of the petals is a soft silvery-white, relieved with enough yellow to make it more attractive. Buds exceptionally long and beautifully formed.

Lady Plymouth (Tea)—The color is a pearly, delicate but deep ivory-cream, faintly flushed, giving it a most piquant finish that is difficult to describe. Awarded gold medal National Rose Society of England and silver medal at Crystal Palace Show, London.

Lady Hillingdon Of quick free growth, with narrow foliage and slender graceful stems, each surmounted with beautiful long pointed bud of rich orange-yellow color. Fine cut flower sort.

Jonkheer J. L. Mock A new pink Rose from Holland; vigorous in growth and hardy, with long smooth canes and great freedom of bloom. Flowers are round and full, bright, pink, faced carmine. Splendid bedder.

Mrs. John Cook White, suffused with delicate pink, describes the color of this strong-growing big-flowered beauty. The color varies with the season, the flush of pink being more pronounced during cool weather, while the Rose is almost white during the long days of bright sunshine. Bud is long and shapely, opens perfectly to a full double flower; petals are of fine texture and substance. Blooms freely and is destined to take front rank among white Roses. Price, 25 cents each; plants from 4 inch pots, 60 cents each.

Mrs. A. R. Waddell A strong, rampant grower with foliage that is ornamental in itself; buds long and pointed, rosy-scarlet, opening copper-salmon; large and semi-double; but a wonderful keeper.

Madame Caroline Testout This charming Rose is in great demand. Clear, bright, satiny-pink; flowers very large and extremely showy; quite distinct. It is the Rose par excellence in Oregon and the Pacific Coast; in fact, it does well everywhere.

Mrs. Aaron Ward One of the most delightful Roses of recent years in a color that catches the eye at once. Coppery-orange in the open bud, golden-orange when partly developed, pinkish-fawn of lovely shade when fully open, when it looks like a full fluffy silk rosette.

Madame Jenny Gillemot Buds long and pointed, deep with dark golden shadings; blooms large, petals immense; opens very freely; a fine upright grower of branching habit; exquisitely beautiful, very large in size, bud very long and pointed.

My Maryland This splendid American introduction is destined to become one of the most popular varieties in cultivation. Large, double flowers, a pleasing shade of salmon-pink. Distinct and beautiful. Splendid for forcing.

Madame Butterfly Fancy colored Rose. It averages more petals to the bloom; it produces more blooms to the plant, because it makes more branches, every one carrying a bud. The buds are a lovely shade of Indian red, yellow at the base; they are unique for corsages and for low table decorations; the opening flowers are perfect in form and texture, clear and brilliant in color, and of delicious fragrance. All the color tones are strong, making it a harmony of bright pink; apricot and gold. Undoubtedly will rank near the top in popularity. Price, 30 cents each; plants from 4 inch pots, 65 cents each.

National Emblem Dark crimson of perfect shape, habit and inflorescence; as a bedding, massing and cutting Rose it is unique. Buds long and pointed, opening to large, full, handsome flowers of great beauty.

MISS AMELIA GUDE

A Charming Yellow Rose.

(H. T.) A cross between Columbia and Sunburst. Bud long, pointed; flower medium size; lasting; outer petals reflexing, deep yellow center, shading to cream; fragrant. Foliage very handsome dark green. Very vigorous, upright; very free bloomer. Price, small plants 30c each; plants from 4 inch pots, 65c each.

EVER-BLOOMING HYBRID TEA ROSES—Concluded

Wellesley.

Wellesley A Beautiful Pink Rose—The color is a beautiful shade of pink, the outside of the petals being bright and clear, with a silvery reverse. It is a very vigorous, healthy grower, carrying the flowers on long, stiff stems, which are clothed with heavy dark green foliage.

Pink La France No variety can surpass it in delicate coloring—silvery-rose shades, with pink. It has a satin sheen over all its petals; hardly beyond question.

President Taft It is without question the most remarkable of all pink Roses. It has a shining, intense deep pink color possessed by no other Rose. It is a fine grower, free bloomer, good size and form, fragrant.

Rhea Reid A Rose of the type of American Beauty, but of the easiest culture. It never mildews or black-spots and opens its large flowers perfectly under all weather conditions. In color it varies with the temperature, in summer a bright cherry-rose while in winter it is a rich crimson-scarlet.

Red Letter Day An exceedingly beautiful Rose of infinite grace and charm. Its velvety brilliant, glowing scarlet-crimson buds and fully opened, cactus-like flowers never fade as the reflex of the petals is satiny crimson-scarlet.

Rose Marie This is a grand Rose of the very highest merit. A rich red that has come to stay. Might best be described as a bright watermelon red. Very desirable.

Radiance Color a brilliant rosy-carmine, displaying beautiful opaline-pink tints in the open flower. The form is fine; flower large and full with cupped petals. A fine variety, especially on account of its value as a summer cut flower variety. Very free in growth and production of bloom, has good habit; lasting qualities of the flower are wonderful.

Red Radiance Similar to Radiance in form and growth, except color, which is a fiery-scarlet. Excellent garden Rose as well as a good forcer. Form is fine, flower large and full cupped petals.

Price, Young Plants, 20c Each, Four for 75c, Twelve for \$2.00. Plants from Four-Inch Pots, 55c Each; Four for \$2.00; Twelve for \$5.50; Except Where Noted.

Sunburst Has long, pointed buds. The color is orange-copper or golden-orange and golden-yellow; edge of petals lighter; all intense shades extremely brilliant in effect. Belongs in the class of Big Roses.

Souv. de President Carnot A charming new French Rose. A strong, clean healthy grower, with handsome bronzy-green foliage and large, elegant shaped buds. The flower is of large size, exquisite shape, with heavy, thick, shell-like petals; buds long and pointed, similar to Niphetos, but very much larger, and all borne on long, stiff, erect stems. Color a delicate rose-flesh, shaded a trifle deeper at center. Very profuse bloomer.

White Ophelia It produces a large flower, and has the strong qualities of growth, foliage, and constitution. Owing to the stiff, beautifully formed outer petals, it holds the bud form longer, and the golden stamens add to the beauty of the opening flower. The color is white, sometimes showing a daybreak pink in the center on opening; never shows a disagreeable color tint, and is free from mildew. Price, 30c each; plants from 4-inch pots, 65c each.

White La France It is identical with La France, except in color. Pure white, sometimes tinted with fawn.

Wm. R. Smith (The Maiden Blush Rose.) A most charming summer bedder with beautiful, firm, glossy foliage quite like Cochet in appearance and durability; very vigorous in growth, with flowers of heavy texture; color, creamy-white with shadings of pink. Succeeds admirably in the open ground, bringing fine blooms on long, stiff stems. Hardy with light protection. This should be in every garden.

White Killarney It is pure white in color, long in bud, of fine form; in fact it is the one Rose par excellence. It is also a great garden Rose.

Red Radiance.

Choice Ever-Blooming Tea Roses

For Outdoor Bedding or Indoor Pot Culture

THE ROSES in this collection are highly valued because of their fine colors and exquisite tea fragrance. They will bloom freely from June until November. This is a collection of Roses that no real Rose lover can afford to miss; some of them are particularly famous for the large size, beauty and brilliant colors of the bloom. They bloom freely; flowering all summer through. If planted in the spring so that they may become thoroughly established during the summer, they will, with few exceptions, prove hardy here, with protection during the winter. They are the product of years of experience and our improved methods of culture, which insure plants of the greatest possible vitality and abundance of bloom. You will be delighted with the exquisite beauty of form and color. Examine the list carefully.

Alexander Hill Gray.

Alexander Hill Gray Color is deep lemon-yellow which intensifies as the blooms develop; flowers large, of great substance and perfect formation; it has a high-pointed center from which the petals gracefully reflex. We recommend it highly.

Blumenschmidt Pure citron-yellow, outer petals edged tender rose, a sport from Franzisca Kruger which it resembles in form, and which has a more vigorous growth. Winner of three first premiums.

Bridesmaid The most popular pink Tea Rose. Thousands of this variety are grown every year for cut flowers, and it is also very desirable for summer bedding out of doors. It is a delightful shade of bright pink, very free flowering and easily grown.

Champion of the World Everyone wants a hardy ever-blooming Rose. From early summer until frost it can be depended upon to produce flowers in abundance; color rich glossy pink, delightfully fragrant, and such a strong, vigorous grower that it is almost invulnerable against attacks of insects.

Etoile de Lyon This magnificent Tea Rose, south of the Ohio river, has proved to be perfectly hardy. Blooms in the greatest profusion and each bud is a gem. Flowers are very large, double full and deliciously fragrant. The color is a beautiful chrome-yellow, deepening at center to pure golden-yellow.

Mlle. Franzisca Kruger The striking color of this handsome Rose places it at once in the front as a bud producer in the open air. In its shading of deep coppery-yellow it stands unique and distinct from all others. The flower, when open, is of good size and very symmetrical. One of the finest Roses to plant in masses and clumps.

Meteor This splendid Rose is one of the brightest colored of all, considered among the very best for bedding and general planting. The color is a rich velvety crimson, exceedingly bright and striking, and the flowers are large and regular, fully double and borne on nice, long stems. It is a quick and constant bloomer and quite fragrant. Never fails to please.

Golden Gate The flowers are extra large, very full and finely formed, and of excellent substance; the buds are long and of the most desirable form; the color is rich creamy-white, beautifully tinged with fine golden-yellow. The petals are large and broad and exquisitely bordered and tinted with clear rose, making altogether a Rose of the rarest and most indescribable beauty.

Hermosa, the Old Favorite Everybody knows this famous variety. It has been held in high esteem for many years and will always be popular, as it embraces so many desirable traits that go to make up the ideal Rose. It is hardy as an oak and always covered with its clear pink blooms.

Helen Good, the Beauty Cochet This is a true Cochet Rose, and we pronounce it as good as, if not better than, any Rose for the garden ever sent out. The color is white, suffused with pink, each petal edged deeper.

Marie Guillot This beautiful Tea Rose continues in popular favor, and still maintains its position as one of the best white Roses of its class; flowers of an unusual style, entirely double to the center; very sweet scented.

Perle des Jardins Probably better known than any other yellow Rose grown. Beautiful clear yellow, distinct from all other Tea Roses.

Souvenir de Pierre Notting The bloom is very large, perfectly full, of elegant form; has a beautiful long bud; the colors are very bright, distinct and clear and have no unpleasant tones—orange-yellow, bordered in carmine-rose.

The Bride The buds are very large and of exquisite form; the petals are of fine texture and substance, and the full flower is very double, measuring from three and one-half to four inches in diameter. The color is a delicate creamy-white. The blooms can be cut with long stems and will last in a fresh state after being cut longer than any known variety.

Clothilde Soupert.

Clothilde Soupert Color a French white, deepening to a rosy-blush in the center, exceeding in distinctness of shadings the well known Malmaison. Its greatest value lies in its compact, vigorous habit and wonderful profusion of bloom. Form and substance of the flowers are so perfect that the hottest weather does not cause a deterioration of either, so that even in midsummer a bouquet of splendid buds and open flowers can be obtained from this fine variety. Hardy with protection.

They should be included with every order.

THE COCHET ROSES

Are unexcelled for beauty of shape and color—and are perfectly hardy south of the Ohio River.

PINK MAMAN COCHET

The Queen of All Garden Roses

Such beauty and exquisite form as is possessed by this variety is well-nigh marvelous, and cannot be seen in any other Rose we know of, outside of its counterpart, White and Yellow Maman Cochet. The buds are beautiful, large, full and firm, and elegantly pointed; as they expand they show great depth and richness, sometimes measuring two and a half inches from base to tip. Flowers superb when open, extra large, perfectly double and of splendid substance. Small pot plants will in the open ground quickly make large, strong bushes, and produce, on long, stiff stems, great numbers of perfect flowers that are enchanting in fragrance and delicate brightness. The color is rich, clear pink, changing to silvery-rose.

RED COCHET

(Mrs. B. R. Cant)

A fine garden variety of even shade of deep rose or red, round and full, the form of a good Hybrid Perpetual. A very free grower, in fact it is one of the strongest growing Roses we have. It flowers as continuously and freely as a China Rose, and is especially fine in autumn. This Rose is bound to take rank with the best Roses grown.

WHITE COCHET

A grand Rose. Identical with its parent, Maman Cochet, the queen of all pink garden Roses, except in color of flower, which is snowy-white, sometimes faintly tinged with the faintest suggestion of pale blush. It has the same freedom of bloom, magnificent form of buds and flowers, which is marvellously beautiful in its perfection. The flowers are large and very double, with petals of unusually heavy texture, making it of more than ordinary value in open ground.

YELLOW COCHET

(Mme. D. Matrat)

The unusual hardness of this Rose—a pure Tea—makes it especially adapted for bedding. It is a fitting companion to those other grand summer Roses—the White and Pink Cochets—offering a sturdy, clean growth with stiff stems and luxuriant bloom. Flowers large, perfectly double and shapely, of a rich sulphur-yellow.

Maman Cochet.

Nothing can take the place of
the Rose ; almost every home
has room for at least a few.

Climbing White Maman Cochet Here we have a climbing form that will become as popular as a climber as its parent has as a bush Rose. Grand, huge white flowers, tinged pink.

Climbing Killarney Color is a most exquisite shade of rich imperial pink; deliciously fragrant. It is a strong, rapid grower.

The Best of the Hardy Rambler Roses

These beautiful new, hardy Climbing Roses are unequalled. There is nothing like them after they become established in their strong, luxuriant growth, freedom of bloom and bright colors. This family of Roses has become so popular everywhere, notably the famous **Crimson Rambler**, **Pink Dorothy Perkins**, **White Dorothy Perkins** and **Excelsa**, that extended descriptions are not necessary. They are almost as necessary adjuncts to one's home as the furniture in it. Absolutely hardy everywhere; once planted, they are practically permanent.

Price, 20c each; any 4 for 75c; 12 for \$2.00; two-year-old plants, 50c; any 4 for \$1.75; 12 for \$5.00.

Goldfinch This is the yellow-flowering "Tausendschoen." All know the good qualities of that superb variety. Well this is a yellow form, and is attracting much attention and many favorable comments.

Gardenia Bright yellow, cream color when open; very fragrant and free; early flowering. This is the hardy Marechal Niel; double yellow flowering.

Hiawatha Distinctly different from other Ramblers. Its small flowers, deep ruby-crimson, accented by a white eye, are uniquely borne in long trails of forty to fifty blooms. This variety is very popular for training on fences, not only as a covering for the fence, but because it is really one of the prettiest Roses of its kind.

Paul's Scarlet Climber Vivid scarlet, shaded crimson. Makes a brilliant display for a long period of time in the garden. A wonderful new climbing Rose. Received the gold medal and cup for the best new climber at the National Rose Society's exhibit.

American Pillar Climbing Polyantha. A new single flowering Rose with blooms two to three inches across, borne in immense clusters. Color lovely apple-blossom pink with bright golden stamens followed in autumn with red hips. A great Rose to grow in pots for Easter.

Blue Rambler (Veilchenblau.) A Rambler or Climbing Rose, with steel-blue flowers, semi-double, medium sized, appearing in large clusters. Has showy yellow stamens, which, combined with the blue of the petals, make a very attractive flower. It is a very strong grower with glossy green foliage and few thorns.

Climbing American Beauty A seedling from American Beauty with Wichuraiana and Tea blood in its veins. The introducers say of it: "Same color, size and fragrance as American Beauty with the addition of the climbing habit. Good foliage, and better blooming qualities. Blooms three to four inches across; has proved perfectly hardy, and stands heat and drought as well as any Rose in our collection."

Christine Wright The Climbing Pink American Beauty. A charming new hardy climber which embodies the strong climbing qualities of the class; the shiny, leathery foliage and healthfulness of the Wichuraianas; and the blooming size and freedom of its Testout blood. The flowers come solitary and in clusters, nearly double, 3 to 4 inches across, in a delightful wild-rose shade of pink.

Dr. W. Van Fleet Flowers when open run four inches and over in diameter. The center is built high, petals beautifully undulated and cupped. The color is a remarkable delicate shade of flesh-pink on the outer surface, deepening to rosy-flesh in the center. The flowers are full and double, of delicate perfume; buds pointed. It very much resembles Souv. de Pres, Carnot in color.

Excelsa A distinct variety in form, color and habit. The color is an intense crimson-maroon, with tips of the petals tinged scarlet. Flowers are large and double, produced thirty to forty on a stem, and almost every eye on a shoot produces a cluster of bright blossoms.

Pink Dorothy Perkins Extremely hardy, withstanding the most severe winters with impunity. The flowers are borne

in clusters of from six to ten and are very double, with prettily crinkled petals. Remarkably pretty pointed buds, beautiful, clear shell-pink in color, lasting a long time without fading. The flowers are sweet-scented. The foliage is rich, deep green, and of thick, leathery substance.

Rosarie (Pink Tausendschoen.) Similar to its parent Thousand Beauties, except color, which is a solid deep rose with much larger clusters and many more blooms.

Tausendschoen, or Thousand Beauties The flowers are the most delicate shade of pink ever seen in a Rose; might be described as a white delicately flushed with pink, changing to rosy-carmine. It gets its name from its many flowers and the variation in coloring.

White Dorothy Perkins A pure white sport of the well-known Dorothy Perkins, of same habit of growth and freedom of flowering; a splendid companion for the pink variety, as it flowers at the same time. A most valuable addition to this class.

We Also Offer Many of the Above-Named Varieties in Field-Grown Plants. See Page 5.

Hardy Hybrid Perpetual Roses

THE HYBRID PERPETUALS or "June Roses," as they are commonly called, are the hardiest of all Roses, standing the cold winters of the North. After once planted they require but little care, increasing in size and beauty each year. They are covered with bloom in June, although they bloom considerably through the summer and fall; but the greatest profusion of bloom is to be seen in June. Our collection of this class of Roses comprises such varieties as are most valuable. They are strong plants, grown on their own roots, will grow and give a profusion of fragrant bloom.

Price, 20 cents each, any four for 75 cents; twelve, for \$2.00. Large two-year-old plants, 55 cents each. Any four for \$2.00; twelve for \$5.50.

Vick's Caprice A striking Rose, totally unlike any other variety. The flowers are large, slightly cupped shaped, but full and deep; the petals are thick and lasting, having the ground color clear satiny-pink, distinctly striped and dashed with white and bright carmine. It makes lovely, elegant-shaped buds which show the stripes and markings to great advantage.

StimUplant Makes a Wonder Garden. See Page 4.

CHRYSANTHEMUMS

TO THOSE who are fortunate enough to have conservatories, there is no restriction of opportunity. The magnificent, large flowered fancy sorts may be forced and developed to the highest state of perfection; furnishing the grower and owner alike with the keen delights of devotion to beauty, and rivalry with kindred enthusiasts. It is an absorbing game, played with a subject second only to the Rose. The average householder, however, must depend upon his garden for the 'Mum show: and is naturally limited to the Earlies, Mid-seasons, Pompons, etc., which will bloom freely during the fall and before winter sets in. The Pompon and Single types particularly make charming potted specimens for the house during early winter. All types may be carried successfully in pots until planting time.

Do not resemble the common Geraniums in any particular, either in foliage or flower; more beautiful in every way. Easter Greeting.

EASTER GREETING

This new species is the earliest of all Pelargoniums, with enormous florets and clusters, having light green foliage and of dwarf, robust growth. It blooms from March until fall. The florets are of a fiery amaranth-red with five regular shaped spots. The first and only kind to bloom as well bedded out as in pots and to do so all summer. The only kind that stands bedding out in groups. It rivals the Azalea in beauty as a pot plant for Easter, and when bedded out in summer will remain in bloom until time for frost in September.

GARDENER'S JOY

The ground color is apple-blossom pink, the two upper petals have blotches of carbon-brown, the florets are three and one-half inches in diameter and are joined to enormous clusters which rise above the beautiful foliage and remind one of a Rhododendron cluster. It is of a half-dwarf nature and very sturdy. On account of its rapid, luxuriant growth, it is a very profitable market variety.

Springfield, Ohio, is the Greatest Plant Producing Center in the World.

Parcel Post brings a greenhouse to your door.

GLORY

This splendid novelty is quite remountant, florets and clusters are very large; ground color blue, very much like the Cattleya Orchid. The upper petals contain two large purple magenta-red spots, distinctly veined. An exceedingly beautiful and entirely new color in Pelargoniums. This kind has a very robust growth.

LIBERTY

Considered by many to be the best novelty yet sent out by Carl Faiss. The color is salmon-red and it has equally sized reddish blotches bordered with scarlet. The flowers are of fine form, semi-double, and they form gigantic trusses. The habit is compact and the flowers held well above the foliage.

LUCY BECKER

This grand novelty is a sport of Easter Greeting and is like it in everything but color, which is a rosy-pink. It is, if anything, even more free in bloom.

PRINCE

FLOWERING BEGONIAS

This Beautiful Class of Plants is Deservedly Popular. They are suitable for Pot Culture in the Window for Winter Blooming. We Can Furnish Flowering Begonias from 2½-inch Pots, 25 Cents Each, 6 for \$1.25 EXCEPT WHERE NOTED.

Argentea Guttata.

ARGENTEA GUTTATA

This variety is an introduction of M. Lemoine and is a cross between Olbia and Alba Picta. This beautiful sort has the silvery blotches of Alba Picta, the grace and beauty of growth of Olbia. It has purple-bronze leaves, oblong in shape, with silvery markings, and is in every way a most beautiful Begonia. Produces white flowers in bunches on ends of growth stems. Good for house culture.

ALBA PICTA—Long, pointed, slender leaves, thickly spotted with silver-white. Foliage small and elegant.

ALBA PERFECTA GRANDIFLORA—We doubt if there is a white-flowered variety that equals it. The foliage resembles Rubra in shape, but it is lighter green, while the flower panicles are much handsomer. It is a pure white flowering Begonia of much merit.

Coralline Lucerne.

CORALLINE LUCERNE (The Wonderful Flowering Begonia)—This new Begonia has simply taken everybody who has seen it by storm. It certainly is a wonder. The blooms last from a month to six weeks, and are borne in immense clusters, almost hiding the plant. The color is bright coral-red, changing to a delicate pink. It is past the power of speech to describe it. A wonder. **Price, 35 cents each.**

CHRISTMAS GIFT, or RED CHATELAINÉ—It is a sport from Gloire de Chateillaine and is exactly like it in foliage and habit, but color of flower is a bright scarlet. Fine for pot culture.

CHATELAINÉ SUPREME—This Begonia is undoubtedly the freest blooming variety known. Is of easy culture, low bushy habit and literally covered the entire year with a wealth of bright pink flowers with yellow stamens. It well merits the name of Ever-Blooming Begonia.

PICTA ROSEA—Very compact in growth, forming a dense, well-proportioned bush with rich green foliage, spotted with silver. Flower rosy-flesh color shaded with a silvery-pink and enlivened with dense clusters of yellow anthers. Most wonderful flowering Begonia within our knowledge.

SANDERSONI—Bushy growing variety; glossy deep green leaves; flowers in clusters of drooping, scarlet, heart-shaped buds.

TUBEROUS-ROOTED BEGONIA

The Tuberos-rooted Begonia is the fashionable plant of the day, and richly does it deserve its honors, for in addition to very handsome foliage, it bears a never-ending profusion of the most ravishingly beautiful flowers the whole summer, and then with the coming of cold weather, very obligingly takes a nap until spring, asking no further care through the winter than to be packed in soil away from frost. The enormous size and intense brilliancy of the flowers astonish those who have never seen any but the ordinary house Begonia. The bulbs can be started from March to June and will be in full bloom. FERNS

Most Beautiful of All Decorative Plants FOR THE HOUSE and CONSERVATORY

No plants are easier to grow or more ornamental for house or conservatory culture than these grand new Ferns. They require very little care or attention, are not troubled with insects or diseases, and produce a finer effect than any other plants you can get for many times their cost. The varieties listed herewith include the newest and most beautiful sorts to date. The ordinary temperature of the living room suits them nicely and their new growths will soon surprise you with their graceful beauty.

Any of the following Ferns in nice young plants, 20 cents each; any four for 75 cents. Strong four-inch pot plants, 50 cents each, except where noted.

VERONA

A handsome new variety of the *Elegantissima* type, somewhat resembling *N. Whitmanii*, but with finer "Ostrich Plume" foliage, and with a stiffer mid-rib, which makes the fronds stand up better than most varieties of the Lace Fern.

Boston or Fountain Fern.

THE POPULAR BOSTON SWORD FERN

(*Nephrolepis Exaltata Bostoniensis*.)

In the vicinity of Boston no other plant is used so extensively as this graceful *Nephrolepis*, which differs from the ordinary Fern in having much longer fronds, which frequently attain a length of four feet. These fronds arch and droop over very gracefully, on account of which it is frequently called the Fountain Fern.

THE "ROOSEVELT FERN"

(*Nephrolepis Roosevelt*.)

In general characteristics it resembles the Boston Fern, but with two points of great excellence over that variety. First it produces many more fronds, making it a bushier and handsomer plant; then the pinnae are undulated, giving it a pronounced wavy effect seen in no other Fern. It is highly recommended.

NEPHROLEPIS SPARROWII

We take great pleasure in offering to our customers for the first time this new and valuable variety, a true sport of the *Neph. Superbissima* (or *Pluffy Ruffles*) Fern. It has the dark green foliage of its parent, which, with its beautiful crested fronds, makes it a most unique, distinct and desirable Fern. One of the most distinguishable features of this new Fern is its robustness, which makes it a very rapid and easy grower, a Fern the amateur can grow with success. We recommend this new variety most highly. **Price, young plants, 25 cents; larger plants, 60 cents.**

JOHN WANAMAKER

A "sport" from *Nephrolepis Scholzei*, with longer, narrower, gracefully drooping fronds. It does not decay in the center, and is a durable house Fern. It is a rapid grower, making an abundance of fronds, and is quite distinct from any other *Nephrolepis*.

OSTRICH PLUME FERN

(*Nephrolepis Whitmanii*.)

An improvement on the *Nephrolepis Elegantissima*, with still more gracefully divided pinnae, giving the whole plant an airy, lace like appearance; makes beautiful symmetrical plants even in small sizes, and large specimen plants are beautiful beyond description.

THE NEWPORT FERN

(*Nephrolepis Scotti*.)

This Fern is all the rage at fashionable Newport. Identical with the Boston Fern, except it is smaller in all of its parts, and more compact, and will make more fronds in a given length of time. The fronds are lighter green than any of the *Nephrolepis*. The plants are never straggly, always making a shapely plant.

Teddy Jr.

"TEDDY JR."

(*Dwarf Roosevelt*.)

A new dwarf form of the popular Roosevelt Fern; a grand compact grower, making splendid specimens in medium size plants.

Beautiful Fuchsias

If properly cultivated, and a suitable place be had where the plants are protected from the midday sun, few flowers can equal the Fuchsias in gracefulness and beautiful showy flowers perpetually coming on. The secret of success with Fuchsias is to keep the plants properly watered and nourished to stimulate fresh, continuous growth and consequently flowers. This satisfactory result requires repeated repotting if plants are kept in pots, or if planted out, much mulching with cow manure and watering.

FROST PROOF CABBAGE PLANTS

OUR FROST-PROOF CABBAGE PLANTS MAY BE SET FOUR TO SIX WEEKS EARLIER THAN HOME GROWN PLANTS, AND WILL MATURE HEADS TWO TO THREE WEEKS EARLIER.

Early Jersey Wakefield

This is the hardest and hardest heading of the extra early sorts, and most Northern gardeners depend upon it for their first crop.

Charleston Wakefield

This sort forms uniform solid heads, considerably larger than the Early Wakefield and matures only a few days later. On clay ground it will mature just as early. Largely planted by gardeners in the South.

Succession

A second early—about two weeks later than Wakefield. The color is light green; the heads are solid, have good keeping quality and are of excellent quality. A favorite with market gardeners.

These plants are grown for us in South Georgia where conditions are ideal for the growth of hard tough plants in the open field. The seed is sown from October to February, and the plants grow slowly and in about two months are hard and stalky enough to ship to any part of the United States. They will stand a temperature of 20 degrees and may be set in the open field much earlier in the spring than hot bed plants. When set out these plants make a slow root growth, and when warmer weather comes are well established. They will then make a very rapid growth, and will mature very early. The increased value of an early crop is worth many times the cost of the plants.

OUR CABBAGE PLANTS

will be shipped direct from our growing station in the South by parcel post or express.

PRICE By Mail, postage paid: Lots of 100, 200, 300, and 400 plants at 50c per 100 plants; 500 plants for \$1.75; 1000 for \$3.00. By Express, Buyer paying express charges: 1000 to 4000 at \$2.00 per 1000; 5000 and over at \$1.75 per 1000. Plants weigh about 20 pounds per 1000 packed for shipment.

"BIRD HOUSE SPECIAL"

In appreciation of the fact that birds and flowers go together, we have made arrangements with a well-known Bird-House manufacturer, to offer to our customers:

TWO WREN HOUSES
complete, as pictured, postpaid \$1.00.

For points west of Colorado, add 5 cents per house.

One dozen, \$5.00, postpaid.

Built especially to attract the beautiful little song bird, **THE WREN**

For the benefit and delight of our customers, we have arranged for the manufacture of thousands of these Wren houses, and are able to offer them at nominal cost. Put up at least two of them in trees or on a building (a nail will do it) and watch the interesting habits of these beautiful little song birds.

The tiny friendly Wrens are found in nearly every part of the United States. They are about one-fourth smaller than the English Sparrow; apparently only half as large, because of their erect tail. They are cinnamon-brown in color; wings and tail being finely barred. They will return and build in the same houses year after year.

Their house-cleaning and home-making is accompanied by the cheeriest of songs.

While the little family is being reared, or, indeed, at any time, no one is wise enough to estimate the millions of tiny insects from the garden and flowers that find their way into the tireless bills of these wrens. They nest three and four times a year, therefore, one should have at least two or four of these houses on their premises.

GLADIOLUS--"The Glory of the Garden"

The Gladiolus has been called "The Glory of the Garden"—and it is indeed well named. Their richly colored spikes display themselves in the costliest gardens—and then go a little farther and you will find the Gladiolus as democratic as any near the poor man's doorstep.

After your first year growing Gladioli you will not wonder why enthusiasts spend their entire lives among them—and consider them the best of all cut flowers. Buy and plant some Gladioli bulbs this spring. In no other way can you purchase so much pleasure for so little money.

For best results they should have a sunny position. A good sandy loam suits them best, but they do equally well in heavy soil provided there is perfect drainage. Well rotted stable manure is the very best fertilizer, and where convenient it should be spread over the land in the fall, and dug in the following spring. The best time to plant is about the first of May. To make a good show they should be planted from three to four inches apart each way. The depth to plant is regulated by the size of the bulb, large bulbs being covered about four inches deep, smaller ones from two to three inches. Our list comprises only the best both in mixtures and in named sorts.

KUDZU VINE

(*Pueraria Thunbergiana*)—A twining vine of remarkably rapid growth, attaining a length of 40 to 50 feet in one season from established roots which are hardy, though the vine dies down every winter in the North. Foliage large and lobed, purple pea-shaped flowers in clusters, borne late in the season. A fine vine for arbors, verandas, etc. **Price, 25 cents each; three for 65 cents.**

Honeysuckle, Hall's Japan.

Hardy Ornamental Climbing Vines—Continued

Clematis Jackmani
and **Henryi**.

Clematis Paniculata.

Clematis Paniculata

We cannot well say too much in praise of this vine. A clean, thrifty, robust-growing vine of graceful habit with attractive glossy foliage, covered in August and September with a sheet of clustered snow-white bloom of the most delicious fragrance. No other vine so completely covers itself with flowers. An arbor or portico over which this Clematis is trained is a wall of white for the time being and what makes it the more striking is that nearly all other vines have ceased blooming at that time. Perfectly hardy, grow rapidly. **Price, 25 cents each; three for 60 cents. Extra large field-grown plants, 50 cents each; three for \$1.25.**

Hardy Large Flowering Clematis

The Clematis we offer this season are exceptionally fine. Many failures in the growing of Clematis are the result of too shallow planting; the crown of the roots should be set at least three inches below the surface of the soil. They delight in a rich, cool soil in an open, sunny position. For covering walls, trellises, or verandas old trees or ruins, or as specimens on the lawn or for massing in large beds on the lawn, they have scarcely an equal, certainly no superior.

Price, for pot-grown plants, 50 cents each; three for \$1.25.

JACKMANI—The flowers, when fully expanded, are from four to six inches in diameter; intense violet-purple, with a rich velvety appearance and distinctly veined.

HENRYI—Fine, large, creamy-white flowers. A strong grower and very hardy; one of the best of white varieties; a perpetual bloomer.

MME. EDOUARD ANDRE—Large-flowering red Clematis. A very unique variety, color a beautiful wine-red, large flowers with heavy petals; a fine contrast to the other sorts.

Dutchman's
Pipe.

Chinese Cinnamon Vines

Pride of the Flowery Kingdom. Beautiful Leaves, Dainty Flowers, Exquisite Perfume. Most Desirable Easily Grown Rapid Climber in the World.

This Oriental Gem of the Far East comes to us a marvel of beauty and fragrance. Its rapid growth, abundant foliage and modest, sweet-scented flowers give it supremacy over all foreign and domestic climbers. The handsome, glossy, heart-shaped leaves and clusters of fragrant white flowers make a window, arbor or veranda a perfect bower of beauty. They stand the severest winter, and burst forth in all their beauty and splendor very early in the spring. No one should miss planting this charming vine.

Once planted, it will last a lifetime. These vines make a long slender root, which should be planted with small end up. **Price of Cinnamon Vine Tubers, or Roots, extra quality, sure to grow. 15 cents each; three for 40 cents.**

(Aristolochia Sipho)—There is no better hardy Climbing vine for shade or screen purposes. The flowers are brown color, long and pipe-shaped, and the large, heart-shaped, deep green leaves, for which it is most valued, seem never to be troubled with either insects or disease; splendid for arch-ways or verandas. **Price, 30 cents each; three for 75 cents.**

HYDRANGEA, "HILLS OF SNOW"

The Most Valuable Hardy Shrub Ever Introduced.

The blooms are very large, of pure snow-white color, resembling a little the hardy shrub so well known, the Snowball, in color and make-up, only they are much larger in size and much more striking. One of the most valuable features is its coming into bloom just after the passing of all the early spring shrubs, while its long season of bloom, from early June through August, renders it a valuable plant not only to the florist, but to the owner of every garden. It is perfectly hardy, standing twenty degrees below zero. Price, nice young plants, strong and healthy, 30 cents each, or three for 80 cents; strong two-year-old field-grown plants, 50 cents each.

HYDRANGEA PANICULATA GRANDIFLORA

This is a grand plant, very showy and attractive, lasting in bloom for months. Without question the finest hardy shrub. Grows three to four feet high and is very bushy and compact. BUTTERFLY BUSH (Buddleia Variabilis)

(Butterfly Bush, or Summer Lilac.) One of the most desirable summer flowering shrubs, beginning to bloom in July, it continues until cut by severe frost. The Lily of the Valley will thrive in any kind of soil and throw up its beautiful, modest, fragrant white bells in the out-of-the-way nooks, the shady spots, the neglected corners, where bolder and more ambitious flowers would scorn to bloom. Will also adapt itself to pot culture in winter, its delicate, permeating fragrance making it especially desirable.

Foundation Planting of Hardy Ferns.

HARDY FERNS

The hardy fern is recognized as one of the most attractive plants for decorative and ornamental purposes in natural groves, parks and private gardens. Most of our native ferns do well under cultivation, and they do especially well in shady and half shaded places; are very useful for growing close to houses and in corners which are too shady for other plants.

Most ferns do best in a light soil containing much vegetable matter, and it is always best to work a considerable amount of leaf mould into the soil of a fern bed. While few ferns grow well in very dry soil, the common notion that they require very wet or almost swampy conditions is not well founded. Most of them, even those that grow naturally in very wet places, do nicely under ordinary garden treatment, in the matter of moisture.

While the native ferns are, of course, perfectly hardy, most of them are better off with a light covering of leaves in winter. In their natural habitat they are usually well covered with leaves and snow throughout the winter.

We offer only the four most popular varieties. One each of the four, postpaid, for \$1.25.

HARDY MAIDENHAIR FERN—(Adiantum Pedatum.)

Perhaps the most graceful of all; attains a height of 12 to 18 inches when grown in rich, moist, well drained shady locations. When once established it increases from year to year. Maiden-hair should be planted for massing, not more than 8 inches apart and plant about 1 inch below the surface. Each, 35 cents; twelve for \$3.50.

CHRISTMAS FERN—This fern, when grown under ideal conditions, attains a height of three feet, its peculiar grace and beauty makes it desirable in all fern gardens. It is one of the very best species for growing as an individual specimen and ranks with the Ostrich and the Osmundas in size and vigorous beauty. Plant the crown level with the surface and if massed effects are desired 12 inches apart. Each, 35 cents; twelve for \$3.50.

OSTRICH FERN—(Onoclea Struthiopteris.) Growing in a crown, fronds 2 to 4 feet by 6 to 10 inches wide; a very erect, handsome species, graceful as a palm. One of the most satisfactory for the amateur, always giving satisfaction in the open or shaded nook. Use lots of manure, leaf mold or well rotted peat and it will multiply by underground runners, especially so in moist, sandy or peat soil. Plant crown level or one-fourth of an inch above surface and mulch in winter. Its vase like masses of foliage are dark green and is one of the tallest of our ferns and should be planted well back. Price, 25 cents each; twelve for \$2.50.

INTERRUPTED FERN—(Osmunda Claytoniana.) A large fern growing in a crown 2 to 3 feet high, 8 inches broad, clothed with rusty wool when young, very beautiful, cinnamon colored leaves. Does well under cultivation in high, shady or open places. Price, 40 cents each; twelve for \$4.00.

MAKE YOUR GARDEN A WONDER GARDEN. SEE PAGE 4.

SUPERIOR FLOWER SEEDS

Our flower seed list has been carefully revised, some new sorts added, and all the inferior kinds omitted, so that there is nothing in the list but what is worthy of cultivation, and if reasonably cared for, will give satisfaction. Our aim is to offer nothing but the best and surest to please, a condensed list of leading kinds, and not the most bewildering and extensive list of varieties.

All the seeds herein offered are grown for us by the most experienced seedsmen of this country and Europe, and are the best that money can buy.

GENERAL CULTURE DIRECTIONS—Most flower seeds germinate well in fine, sandy loam, partly protected from the sun. Heat and moisture are the two essential points to start life in seeds. A general and fatal error is to start the seed too deep; small seeds should be barely covered with fine earth; large seeds by about half an inch. After sowing, the ground should be watered with a very fine sprinkler regularly. Many seeds are killed by drought.

Newest and Best Sweet Peas

Everybody likes Sweet Peas and they are grown with so little care, and bloom so profusely that the smallest garden should contain a good supply. Sweet Peas should be sown as early in spring as possible. The soil should be rich, the drills six inches deep. Cover first about an inch, and as the plants grow fill in until the drill is full. A mulch of hay or rakings from the lawn will be found beneficial during hot weather. The flowers should be cut as often as possible, to prevent the plants from running to seed, which would stop them from continuing to bloom.

EARLY SWEET CORN "GOLDEN BANTAM"

Golden Bantam is becoming each year more firmly fixed in popular favor because of its extreme early character, vigorous growth and surpassingly delicious flavor. It is pronounced by thousands of planters the finest extra early Sweet Corn ever grown. Although the dry grain is entirely free from any flinty glaze, it is exceptionally hard and firm, hence can be planted earlier than any other true Sweet Corn. The stalks are dwarf and sturdy in habit, growing to a height of four feet; they bear two and three good small ears, which have eight rows of broad yellow grains, extending to the extreme rounded tip. Golden Bantam is as distinct in flavor from that of white varieties as in color—being almost literally "sweet as honey." The skin is exceptionally tender. Price, per packet, 10 cents; one-half pound, 25 cents; one pound, 40 cents.

Golden Bantam.

BRUSSELS SPROUTS, or MINIATURE CABBAGE

If more widely known, the Brussels Sprout would be as popular as it is valuable; few people appreciate its full worth as a winter vegetable. The small cabbages grow on stalks in great profusion. It is not the least affected by frost, and equal to cauliflower in flavor. Per packet, 5 cents; ounce, 35 cents.

AMERICAN WONDER PEA

This is a first-rate wrinkled pea of dwarf habit, with vines less than a foot high. It is better suited to the private garden than for market purposes; in fact, it has taken the place in the private garden once occupied by Tom Thumb, one of the earliest of the wrinkled varieties. Packet, 10 cents; one-half pound, 25 cents; pound, 45 cents.

PURPLE TOP STRAP LEAF TURNIP

One of the best table turnips on the market, being fine grained, never stringy and of mild flavor. It is white below, with a bright purple top; flesh white, leaves short, narrow and erect. Will mature in eight or nine weeks. Excellent keeper. Packet, 5 cents; ounce, 15 cents; one-quarter pound, 50 cents.

DWARF STRINGLESS GREEN POD BEAN.

Although an old standard sort, it is as yet unexcelled for general usefulness. It is early, prolific, without any string or fibre, and of the finest quality. The pods are round, of good length and straight. The color is a deep rich green. The flesh is thick and meaty. Packet, 10 cents; one-half pound, 25 cents; pound, 40 cents.

VELVET LAWN GRASS MIXTURE

Nothing adds more to the attractiveness of a home than a well-kept, close, velvety lawn. Our lawn grass seed is the very best quality mixture of the finest varieties of natural grasses, embracing such as are of neat growth, hardy and best adapted to produce a permanent and fine turf. The quantity of seed required per acre is from three to four bushels. One quart will sow a space of 15x20 feet, or 300 square feet. Our Velvet Lawn Mixture is a compound of grasses that ripen successively, thereby always presenting a green and cheerful appearance. Lawns sown with only one or two grasses turn brown under our hot sun, and remain in that condition until the cool months of autumn revive them. Our mixture can be relied upon to produce the best results. Price, pound, 50 cents, postpaid; by express, five pounds or more, 40 cents per pound.

SHADY PLACE LAWN GRASS

Usually it is quite difficult to obtain a satisfactory growth of grass under trees and in shady places; for sowing in such places we recommend the use of this special mixture. The grasses used in making this special mixture are only those that are well adapted for growing in shade. Price, 60 cents per pound, postpaid. By express, 5 pounds or more, 50¢ per pound.

The varieties we are offering below are the best possible to plant either for home growing or commercial purposes.

It has been tested and largely planted in many sections of the country.

**NIAGARA GRAPE**

NIAGARA—When fully ripe the berries are a greenish-yellow. Skin tough with quality similar to the Concord. This is the leading white grape for home and market use.

AGAWAM—Large, compact, dark red or maroon colored berries. Ripens early and is very attractive.

SALEM—A strong, vigorous vine; berries large. September.

BLACKBERRIES

ELDORADO—This is a comparatively new variety, and has proven itself to be the best of all blackberries under cultivation. After once fruiting Eldorado, berry growers discard almost all other varieties which they have. It is very hardy, claimed to have no equal in this respect. Fruit very large, jet black, good shipper, good quality, and a great producer. We personally recommend this variety above any other that is offered.

SNYDER—Very hardy, great producer, medium size and one of the best known varieties of blackberries, succeeding wherever planted. Over production is its greatest fault.

Price, 10 for 60 cents; 100 for \$5.25, postpaid.

RASPBERRIES

CUMBERLAND—The fruit of this variety is largest of all the black caps; firm, a good shipper, and one of the most profitable as a market berry. Very choice black cap.

CUTHBERT—Considered the queen of the market, as they bring a higher price on the market than any other of the red raspberries. The fruit is large, dark, crimson, firm, sweet, rich, highly flavored, and as beautiful as strawberries.

KING—A very early red berry that always commands a good price. The plants are hardy and productive and the King Raspberry is earlier than any other variety.

Price of the above named varieties, 10 for 55 cents; 100 for \$5.00, postpaid.

St. Regis Everbearing

This raspberry of recent introduction stands in a class alone. It will produce fruit from June until the berries freeze in the fall or early winter. The fruit begins to ripen very early and continues on the new canes throughout the remainder of the summer and fall months. Berries are a bright crimson, good size, rich, sugary, with excellent raspberry flavor. Flesh firm and meaty, a good shipper. Prices on St. Regis, 10 for 80 cents; 100 for \$5.50, postpaid.

GRAPES

One of the most satisfactory crops that can be grown, because it can be depended upon practically every year. Grape vines will grow almost everywhere, but to produce the finest specimens they should be carefully cultivated and pruned. A south or southwestern exposure will, as a rule, give best results. The soil should be dry, and if not naturally so, should be artificially drained before planting.

A top dressing of well-rotted manure should be applied each year, alternated every few years with a dressing of slaked lime.

Grapes can be easily trained over fences, buildings, arbors, summer-houses, pergolas, etc., and in this way are ornamental as well as useful. The enemies of the grape vine and fruit are very few and can be easily kept in check.

Price—Extra strong vines, 30 cents each, 10 for \$2.75, 25 for \$6.25, postpaid. One each of the set of six for \$1.65.

CONCORD—From sheer merit the Concord has become the most popular grape in the United States. Taking the country as a whole, more Concord are now in bearing than of any other variety. No other grape succeeds over such a wide area or in so many different soils. It is the standby in grapes. New varieties may come, but they have to work hard to reach the Concord standard for market purposes. Matures early, keeps well, ships well and sells well. Bunches big, berries are juicy, sweet and delicious. Concord overcomes local grape troubles and is safe to plant.

WORDEN—A seedling of the Concord. Large, bunches which ripen ten days earlier than the Concord. This variety deserves a good place on the market and should be planted in every garden.

WYOMING—Vine very hardy, healthy and robust. Berries a beautiful light red; nearly double size of Delaware. Flesh tender, sweet, juicy. Best early red grape.

MULBERRIES

On account of the beautiful heavy foliage and compact growth of the mulberries, they are frequently classed as ornamental trees. They are very hardy and long lived, in fact one specimen of which we know is more than three hundred years old. Throughout the Western States they are frequently planted for wind-breaks and hedges, and are valuable for posts and because the fruit attracts many birds, they can be planted as a protection to orchards. Price, 3 to 4 ft., 75 cents each. (By Express.)

EVERBEARING STRAWBERRIES

Prices, 12 for 75c, 100 for \$2.00, Postpaid.

Progressive (Per.)—A wonderful ever-bearing strawberry, as the spring-set plants not only produce big crops of berries the same season, but the runner plants also begin to bear fruit as soon as they are set, and in this way Progressive yields a crop of fruit the first year. Fruit good size, of good color and appearance. Progressive will please you.

Champion (Per.)—The best and most profitable ever-bearing strawberry grown. Berries are much larger than other varieties and of far better quality and better appearance. After the first year, they produce a big crop in June and again in the fall. It is the best known and most widely planted. Plants are strong and stand the winter well. The fruit is large, round, dark colored, glossy and attractive.

RHUBARB

Plants, 15c each, 12 for \$1.50, Postpaid.

Linnaeus Leaf-stalks long, large, tender, juicy, produced quite early. Cellar-grown rhubarb with beautifully pink, tender stalks may be enjoyed in March by anyone who will devote a little time to it. For this crop the plants are grown from spring until fall in very rich soil so as to establish a number of crowns

on each root. In the fall a number of roots are packed together with rich soil in some cool, dark cellar. After the crop has been cut, the roots are replanted in the garden to regain their vigor for the next year's forcing.

ASPARAGUS PLANTS

Prices, 12 for 65c, 25 Plants for \$1.10, 100 for \$3.25, Postpaid.

It is not necessary to tell the good qualities of the asparagus, as it is known to everybody. It is the most healthful and delicious of the early vegetables. It is very easily grown, and no plant will produce as the asparagus does with as little outlay. May be either planted in fall or spring. Dig up the ground deep, put on plenty of well-rotted manure, thoroughly mixed in the soil, throw out a bed about four to five inches deep, lay the plants in by spreading the roots out well, and scatter the dirt over the plants about four inches, or the depth of the ground thrown out, press the dirt well around the plants by patting it down with a spade or shovel, then top-dress the ground with about three inches of well-rotted manure and scatter salt enough over the top of this to make the ground white enough to track a rabbit. The second year after planting, you will be able to harvest enough asparagus for a good sized family from a bed of about two hundred plants. Two hundred plants will make a bed three feet wide and fifteen feet long. Keep the crown of the asparagus cut regularly so it will not get too large and woody.

PLANT A PRIVET HEDGE FENCE

It will cost you less than the cheapest fence you can build.

It will outwear the best fence you can build.

It will look better than any fence you can build.

Ibolium Privet

If California Privet were hardy everywhere, there would be no need of any new variety of Privet. In spite of the fact that California Privet freezes down occasionally, it has become the most popular hedge plant.

The Ibolium Privet however combines all the good qualities of the California Privet with perfect hardiness, making it the best Privet hedge plant on the market today.

It has shiny deep green leaves, holds them till late in the winter, does well in all kinds of soil and in all kinds of locations, grows rapidly and is perfectly hardy.

PRICES OF IBOLIUM PRIVET

We offer plants, 18 to 24 inches high, by mail, postpaid, for 25c each; \$2.50 per doz. By express, 25 for \$5.00; 100 for \$15.00.

California Privet

There are many plants that can be used with satisfactory results for hedges but the great demand for California Privet proves it to be the most popular of all hedges. When we stop to consider that its cost is trifling when compared with either wood or iron fences and that it will outlive either, the reason for its increased popularity becomes apparent. California Privet can be planted in either single or double rows and should be planted 8 inches apart. 100 plants will make a fence 66 ft. long and using our 12 to 18 inch size would cost only \$5.00. The California Privet will hold its leaves thru most of the winter months and can be trimmed to any desired shape. When compared to a mechanical fence of any kind it is a comparison of the living with the dead as your wood and iron fence will rot down whereas the privet will become more beautiful each year. We have had a very favorable growing year and have a better stock of California Privet this year than ever before. Plant a hedge of these and you will never regret it.
